

In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (currently amended) A rectangular, refrigerated freight container having length width and height dimensions of a standard size, a roof, a floor, walls, a door frame and two doors at one end, the doors being of the same height but with substantially different width dimensions and extending to the floor of the container, the smaller door having locks which can only be operated from inside the container, wherein the larger door has an internal door release mechanism with a release knob accessible ~~which acts from inside the container~~ that acts on an external door release mechanism, and wherein a security bar can be locked between the two doors to prevent operation of the external door release mechanism, and wherein a part of the door frame itself forms the bottom of the container such that the frame will be in contact with the ground when the container is set down.

2.-8. (canceled)

9. (previously presented) A container as claimed in Claim 1, wherein a customs seal can be applied to the security bar.

10. (previously presented) A container as claimed in Claim 1, wherein an end face of the container has a door frame which is reinforced to prevent skewing of the frame if it is resting on uneven ground.

11. (canceled)

12. (previously presented) A container as claimed in Claim 1, wherein the doors extend the full height of the container so that when both doors are opened, access to that end of the container is unobstructed.
